

**Course Outline**  
**Special Topics–Biological Sciences**

**Course Description:**

**BI253/254.** Special Topics – Biological Science. 3 hours credit. Prerequisite: Approval of division dean and instructor. Topics of specific interest to the student will be developed. These topics will be established by student's needs or requirements. Areas of specific needs will be pursued and instructional material that lends itself to current trends or topics that are needed to supplement normal classroom instruction will be offered.

**Textbook:**

No standard text will be used. Textbooks and/or reference material will be used when needed. Instructional materials will be developed for each topic.

**Course Objectives:**

Specific objectives will be developed after the topic or topics are established. These objectives will:

- 1.meet the special needs of students through topics in seminars.
- 2.provide topics for specific interest groups.
- 3.provide for students to meet their educational goals and needs.

**Method of Instruction:**

The method of instruction will be developed after the topic or topics are established.

**Methods of Evaluation:**

The method of evaluation will be developed after the topic or topics are established. The grading system will conform to the policy and procedures on grading and testing developed by the instructor.
